Koolbridge Solar signs on 3- highly qualified and experienced North Carolina solar installers.

Southern Energy Management, Sundance Energy Management and Cape Fear Solar Systems to represent Koolbridge Solar in NC, SC, VA, GA, TN and KY. The Founders of these companies have also joined Koolbridge Solar's Board of Advisors.

"We are very fortunate to have signed up the top 3-solar installers in the Southeast US market to represent Koolbridge Solar to their customer base. The experience, talent, knowledge and understanding of how solar energy can help reduce a homeowner's electrical costs make them an outstanding partner," said Bill Griffin, President, Koolbridge Solar.

About Southern Energy Management

Southern Energy Management, headquartered in Morrisville, NC, is the Southeast's rooftop solar and building performance expert. Founded in 2001, they've worked for more than a decade to improve the way people—homeowners, businesses, builders, and developers—create, consume, and conserve energy. With over 60-team members, the company has prided itself on continuously innovating and leading the energy market

forward while maintaining the core values it was founded upon. More information about Southern-Energy Management can be found at: www.southern-energy.com.

“Southern Energy Management is excited to partner with Koolbridge Solar to move their products forward. The smart load panel will help Solar customers optimize their production and save more money. We look forward to continued support in launching these exciting new products,” said Bob Kingery, President Southern Energy Management.

About Sundance Power Systems

Sundance Power Systems was established in 1995 and has built a solid reputation for being a trusted partner for solar projects throughout the region. From education to empowerment, the Sundance team brings significant skill and expertise to all aspects of project development. Technology offered by the Company includes, Solar , Wind, and Hydro - Electric systems, Solar Thermal, Radiant Floor Heating and Energy Efficiency. To learn more about Sundance Power Systems go to: www.sundancepower.com.

“We are pleased to be working with Koolbridge Solar to represent their exciting new products. In the 22-years we have been in this industry we have seen many products come and go and I am convinced that the Koolbridge product will bring significant value to solar customers by reducing the cost of solar and allowing for broader adoption of solar into markets that have been traditionally closed to customer owned solar,” said Dave Hollister, President and CEO.

About Cape Fear Solar Systems, LLC

Cape Fear Solar Systems is the most experienced locally grown and operated solar installer in the region. Established in 2007, the company has designed and installed over 450 solar systems to date. Cape Fear Solar’s pride is in its team, providing the highest quality of craftsmanship, products & material and post installation customer support. The company is the only Sunpower Elite dealer in the region. SunPower solar panels are recognized globally as the most efficient, and therefore, the most power producing panels, used by NASA and other organizations world-wide. Cape Fear Solar offers turnkey energy systems such as photovoltaic (solar electric) panels, battery

backups, generators, solar water heaters and pool heating systems for residential and commercial customers. To learn more about the company and solar technology, please visit <http://capefearsolarsystems.com/>.

“Everyone on our team is passionate about solar and together we are thrilled to be working with such an innovative company like Koolbridge Solar. We are convinced that solar is one of the best investments presently available and along with the advantage over our competition that offering Koolbridge Solar’s SMART LOAD CENTER has for our customers, they will greatly appreciate how much lower their monthly electric bill is once we have installed it in their home,” stated John Donoghue, President, Cape Fear Solar.

About Koolbridge Solar

Koolbridge Solar is the **“Gateway to the Intelligent Home”**. It is the first company to design, develop and sell the next generation of innovative intelligence driven, solar-ready, electrical power products that automatically select the most economical use of utility, solar, battery, wind or generator power for homes and businesses on a circuit by circuit basis. Koolbridge Solar has patented and patent-pending products under development that effectively capture, manage and distribute electrical energy throughout homes or businesses. Moreover, with Koolbridge’s first product, the SMART LOAD CENTER™, there is no power interruption whatsoever if the grid goes down while using solar power.
